Abstract. To most parents the diagnosis of cystic fibrosis (CF) in their child represents a severe blow because they are confronted with an unwanted and unexpected disease that completely changes their whole life. Common reactions such as shock, denial, sadness and anger have to be mastered before a gradual adaptation to reality will be possible. The provision of support by a multidisciplinary team, including a psychologist, that offers its services from diagnosis and puts an emphasis on ...

Cystic fibrosis: psychological issues

Gastrointestinal (GI) problems are the second most common set of issues caused by cystic fibrosis (CF). The purpose and function of the GI tract. The GI tract is a long tube that runs from the mouth to the anus. It is responsible for turning the food you eat into nutrients that your body can use.
