In an online, interconnected world, democracy is increasingly made up of wikis and blogs, pokes and tweets. Citizens have become accidental journalists thanks to their handheld devices, politicians are increasingly working online, and the traditional sites of democracy - assemblies, public galleries, and plazas - are becoming less and less relevant with every new technology. And yet, this book argues, such views are leading us to confuse the medium with the message, focusing on electronic transmission when often what cyber citizens transmit is pictures and narratives of real democratic action in physical space. Democratic citizens are embodied, take up space, battle over access to physical resources, and perform democracy on physical stages at least as much as they engage with

ideas in virtual space. Combining conceptual analysis with interviews and observation in capital cities on every continent, John Parkinson argues that democracy requires physical public space; that some kinds of space are better for performing some democratic roles than others; and that some of the most valuable kinds of space are under attack in developed democracies. He argues that accidental publics like shoppers and lunchtime crowds are increasingly valued over purposive, active publics, over citizens with a point to make or an argument to listen to. This can be seen not just in the way that traditional protest is regulated, but in the ways that ordinary city streets and parks are managed, even in the design of such quintessentially democratic spaces as legislative assemblies. The book offers an alternative vision for democratic public space, and evaluates 11 cities - from London to Tokyo - against that ideal.

Moving from classical Greece to the present, *Public Space and Democracy* provides both historical accounts and a comparative analytical framework for understanding public space both as a place and as a product of various media, from speech to the Internet. These essays make a powerful case for thinking of modern technological developments not as the end of public space, but as an opportunity for reframing the idea of the public and of the public space as the locus

of power.

This is a bold new study of the recent emergence of democracy in Latin America. Leonardo Avritzer shows that traditional theories of democratization fall short in explaining this phenomenon. Scholars have long held that the postwar stability of Western Europe reveals that restricted democracy, or "democratic elitism," is the only realistic way to guard against forces such as the mass mobilizations that toppled European democracies after World War I. Avritzer challenges this view. Drawing on the ideas of Jürgen Habermas, he argues that democracy can be far more inclusive and can rely on a sphere of autonomous association and argument by citizens. He makes this argument by showing that democratic collective action has opened up a new "public space" for popular participation in Latin American politics. Unlike many theorists, Avritzer builds his case empirically. He looks at human rights movements in Argentina and Brazil, neighborhood associations in Brazil and Mexico, and election-monitoring initiatives in Mexico. Contending that such participation has not gone far enough, he proposes a way to involve citizens even more directly in policy decisions. For example, he points to experiments in "participatory budgeting" in two Brazilian cities. Ultimately, the concept of such a space beyond the reach of state administration

fosters a broader view of democratic possibility, of the cultural transformation that spurred it, and of the tensions that persist, in a region where democracy is both new and different from the Old World models.

What do the recent urban resistance tactics around the world have in common? What are the roles of public space in these movements? What are the implications of urban resistance for the remaking of public space in the "age of shrinking democracy"? To what extent do these resistances move from anti- to alter-politics? *City Unsilenced* brings together a cross-disciplinary group of scholars and scholar-activists to examine the spaces, conditions, and processes in which neoliberal practices have profoundly impacted the everyday social, economic, and political life of citizens and communities around the globe. They explore the commonalities and specificities of urban resistance movements that respond to those impacts. They focus on how such movements make use of and transform the meanings and capacity of public space. They investigate their ramifications in the continued practices of renewing democracies. A broad collection of cases is presented and analyzed, including *Movimento Passe Livre* (Brazil), *Google Bus Blockades* San Francisco (USA), the *Platform for Mortgage Affected People* (PAH) (Spain), the *Piqueteros Movement*

(Argentina), Umbrella Movement (Hong Kong), post-Occupy Gezi Park (Turkey), Sunflower Movement (Taiwan), Occupy Oakland (USA), Syntagma Square (Greece), Researchers for Fair Policing (New York), Urban Movement Congress (Poland), urban activism (Berlin), 1DMX (Mexico), Miyashita Park Tokyo (Japan), 15M Movement (Spain), and Train of Hope and protests against Academic Ball in Vienna (Austria). By better understanding the processes and implications of the recent urban resistances, *City Unsilenced* contributes to the ongoing debates concerning the role and significance of public space in the practice of lived democracy.

In The Empty Place: Democracy and Public Space Teresa Hoskyns explores the relationship of public space to democracy by relating different theories of democracy in political philosophy to spatial theory and spatial and political practice. Establishing the theoretical basis for the study of public space, Hoskyns examines the rise of representative democracy and investigates contemporary theories for the future of democracy, focusing on the Chantal Mouffe's agonistic model and the civil society model of Jürgen Habermas. She argues that these models of participatory democracy can co-exist and are necessarily spatial. The book then provides diverse perspectives on how the role of physical public space is articulated through three modes of participatory spatial

practice. The first focuses on issues of participation in architectural practice through a set of projects exploring the 'open spaces' of a postwar housing estate in Euston. The second examines the role of space in the construction of democratic identity through a feminist architecture/art collective, producing space through writing, performance and events. The third explores participatory political democratic practice through social forums at global, European and city levels. Hoskyns concludes that participatory democracy requires a conception of public space as the empty place, allowing different models and practices of democracy to co-exist.

Examines the evolution of an undervalued urban space and how conflicts over competing uses—from the right to sit to the right to parade—have been negotiated. Urban sidewalks, critical but undervalued public spaces, have been sites for political demonstrations and urban greening, promenades for the wealthy and the well-dressed, and shelterless shelters for the homeless. On sidewalks, decade after decade, urbanites have socialized, paraded, and played, sold their wares, and observed city life. These many uses often overlap and conflict, and urban residents and planners try to include some and exclude others. In this first book-length analysis of the sidewalk as a distinct public space, Anastasia Loukaitou-Sideris and Renia

Ehrenfeucht examine the evolution of the American urban sidewalk and trace conflicts that have arisen over its competing uses. Drawing on historical and contemporary examples as well as case study research and archival data from five cities—Boston, Los Angeles, New York, Miami, and Seattle—they discuss the characteristics of sidewalks as small urban public spaces, and such related issues as the ambiguous boundaries of their “public” status, contestation over specific uses, control and regulations, and the implications for First Amendment speech and assembly rights.

Fighting for First Amendment rights is as popular a pastime as ever, but just because you can get on your soapbox doesn't mean anyone will be there to listen. Town squares have emptied out as shoppers decamp for the megamalls; gated communities keep pesky signature gathering activists away; even most internet chatrooms are run by the major media companies. Brave New Neighborhood sconsiders what can be done to protect and revitalize our public spaces.

57e3e6bd7b7669e2b.jpg" We live in divisive and polarizing times, often remaining in comfortable social bubbles and experiencing few genuine interactions with people who are different or with whom we disagree. Stepping out and turning to one another is difficult but necessary. For our democracy to thrive at a time when we face wicked problems that involve tough trade-offs it is vital that all citizens participate fully in the process. We need to learn to listen, think, and act with others to solve public problems. This collaborative task begins with creating space for democracy. This book provides a guide for doing so on campus through deliberation and dialogue. At the most basic level, this book describes collaborative and relational work to engage with others and co-create meaning. Specifically, dialogue and deliberation are processes in which a diverse group of people moves toward making a collective decision on a difficult public issue. This primer offers a blueprint for achieving the civic mission of higher education by incorporating dialogue and deliberation into learning at colleges and universities. It opens by providing a conceptual framework, with leading voices in the dialogue and deliberation field providing insights on issues pertinent to college campuses, from free speech and academic freedom to neutrality and the role of deliberation in civic engagement. Subsequent sections describe a diverse range of methods and approaches used by several organizations

that pioneered and sustained deliberative practices; outline some of the many ways in which educators and institutions are using dialogue and deliberation in curricular, co-curricular, and community spaces, including venues such as student centers, academic libraries, and residence halls. All of the chapters, including a Resource Section, provide readers with a starting point for conceptualizing and implementing their own deliberation and dialogue initiatives. This book, intended for all educators who are concerned about democracy, imparts the power and impact of public talk, offers the insights and experiences of leading practitioners, and provides the grounding to adopt or adapt the models in their own settings to create educative spaces and experiences that are humanizing, authentic, and productive. It is an important resource for campus leaders, student affairs practitioners, librarians, and centers of institutional diversity, community engagement, teaching excellence and service-learning, as well as faculty, particularly those in the fields of communication studies, education, and political science.
