The Future Combat Mission System (FCMS) consortium will start designing an innovative suite of connected and distributed sensors for the Future Combat Air System (FCAS). The sensors will follow the requirements of the FCAS participating nations (France, Germany and Spain), and will contribute to the sixth-generation aircraft's situational awareness and ability to operate without being detected.

A fighter aircraft, often referred to simply as a fighter, is a military fixed-wing aircraft designed primarily for air-to-air combat against other aircraft. The key performance features of a fighter include not only its firepower but also its high speed and maneuverability relative to the target aircraft.. The fighter's main tactical purpose is to establish air superiority over the battlefield.

Whitford, 1987 ...

The ship design and manufacture programme, known as the Global Combat Ship, was created by the UK Ministry of Defence to partially replace the navy's thirteen Type 23 frigates, and for export. Its primary role is to conduct advanced anti-submarine warfare missions while supporting air defence and general purpose operations.

Type 26 frigate - Wikipedia

The Air Combat Electronics program office (PMA-209) launched its new Hardware Open Systems Technologies (HOST) website on Oct. 20, which provides a hardware framework for designing the open architecture (OA) embedded computing systems for DoD systems. Developed by a team from academia,

Design for air combat (Book, 1987)
[WorldCat.org]

Aircraft combat survivability is now an established design discipline for U.S. military aircraft. More importantly, survivability is now an essential part of the U.S. Department of Defense acquisition process. This is the only book of its kind and required reading for anyone involved in design of air combat vehicles.
