Digital Health: Meeting Patient and Professional Needs ...

The empowerment of citizens for better health literacy allows patients to better protect their health and contributes to the common digital strategy that benefits society as a whole (WHO, 2017). One way to do this is to create easy, assertive, clear, and positive means of passing on messages and specific actions for greater effectiveness (Bandura, 1999) in the use of digital health.

Technology 'sometimes a barrier' for patients and providers during Covid. The NHS rapidly adopted digital health solutions during the Covid-19 pandemic but IT systems "were sometimes a barrier" for patients and providers, a new report has found. The Care Quality Commission's (CQC) annual state of care report found technology enabled more joined-up care, and provided tools for virtual consultations and better information sharing during the pandemic.
