COMPEX ELECTRODE PLACEMENT GUIDE PDF

ECG electrode placement is standardised, allowing for the recording of an accurate trace – but also ensuring comparability between records taken at different times. Poor electrode placement can result in mistaken interpretation, and then possible misdiagnosis, patient mismanagement and inappropriate procedures (Khunti 2013). Deviation of lead placement even by 20-25mm from the correct position can create clinically significant changes on the ECG, including changes to the ST-segment (McCann ...

What Is Erotic E-Stim - Electrosex

Aside from a 12-lead ECG placement, there's something known as a 15-lead placement which includes placing leads V4-V6 on the posterior side of the patient below their left scapula (see below). When viewing the EKG strip, V4-V6 on the strip will be referred to as V-13-15. To clarify, leads will equal: V4=V7, V5=V8, and V6=V9.
