~~Of The Cyber Domain~~

Evolution of the Cyber Domain is a useful resource for readers who seek a comprehensive picture of cyber affairs, and who wish to understand the social, economic and politico-military challenges that have guided the development and use of ICTs in the past six decades. By summarising the ways in which governments are addressing these challenges at the strategic level, it helps prepare decision-makers and researchers involved in the formulation of cyber-

~~Evolution of the Cyber Domain: The
Implications for ...~~

The military utility of the cyber domain is linked to the economic and social potential of information and communications technologies (ICTs), while technologies with military and national-security applications have become essential to the conduct of modern life. In light of this, Evolution of the Cyber Domain provides a holistic review of the strategic, operational and technical issues at the centre of the international cyber-security debate.

state-made domain, as opposed to a man-made one. Anatoly Kitov, Paul Baran and Donald Davies – a Soviet computer scientist, an American engineer and a Welsh computer scientist respectively – all envisioned in the late 1950s a computerised, interconnected communication system. 1 While Kitov's initiative never moved forward, Baran and Davies were able to continue creating the ...

~~Introduction – iiss.org~~

Evolution of the Cyber Domain contextualises all of these issues. It casts light on the political and strategic aspects of technological and technocratic developments, and on the multifaceted realm of international cyber affairs more broadly.
