Some scholars consider feminist campaigns to be a main force behind major historical societal changes for women's rights, particularly in the West, where they are near-universally credited with achieving women's suffrage, gender-neutral language, reproductive rights for women (including access to contraceptives and abortion), and the right to enter into contracts and own property.

In this book, the author draws on over a decade of first-hand experience as an academic-activist and on interviews with women in Malaysia's women's rights movement. Despite a considerable array of challenges to their participation in the public and political spheres, the movement is especially vibrant. Presenting insights from feminist activists in Malaysia, the book explores the Women's Candidacy Initiative's efforts to promote independent women in Parliament; the work of women's coalition the Joint Action Group for Gender Equality; how activists understand and experience the concept of feminism; and finally the place of men in feminism. Women's Activism in Malaysia will be of interest to students and scholars across a range of disciplines including gender studies, politics and sociology.

When Betty Friedan produced *The Feminine Mystique* in 1963, she could not have realized how the discovery and debate of her contemporaries' general malaise would shake up society. the magazines, and found themselves forced to seek meaning in their lives only through a family and a home. Friedan's controversial book about these women - and every woman - would ultimately set Second Wave feminism in motion and begin the battle for equality. This groundbreaking and life-changing work remains just as powerful, important and true as it was forty-five years ago, and is essential reading both as a historical document and as a study of women living in a man's world. 'One of the most influential nonfiction books of the twentieth century.' New York Times 'Feminism began with the work of a single person: Friedan.' As one of the main players in the second wave of feminism, Sheila Tobias returns to Kate Millets central tenet, sexual politics, and argues that it can still unite progressive men and women around a common set of goals. Providing a map of a complex terrain, Tobias details generations of issues, each more radical and therefore harder to tackle than the ones before. She sets the story in two contexts: feminisms own evolving strategies and Americas political landscape. Even though her passion for feminism remains, she is not unwilling to critique the sisterhood and herself for failing to see, for example, that not every woman would be a feminist nor every man an enemy. In the heady first years, feminists forgot that deeper even than gender is the liberal/conservative divide in American politics. }As one of the main players in the second wave of feminism, Sheila Tobias returns to Kate Millets central tenet, sexual politics, and argues that it can still unite progressive men and women around a common set of goals. In the heady first years, feminists forgot that deeper even than gender is the liberal/conservative divide in American politics. From the origins of the movement through feminist theory and new scholarship on women, Tobias traces the political history of the second wave and its comeuppance at the hands of Phyllis Schafly's StopERACoincidental with the nations careering toward the Right. Somehow, feminism survived the 1980s, but by having to fight brush fires throughout the Reagan-Bush presidencies, the movement lost some of its breadth and much of its taste for the mainstream. Because of her activism and her feeling for the period she chronicles, Tobias is at once inside and outside the issues of sexual preference, pornography, the draft, the Mommy Track, comparable worth, affirmative action, reproductive rights, and the challenges of equality versus difference. }

View the Author's website! Seely, the youngest elected president of California's chapter of the National Organization for Women, combines her own story of third-wave feminism with an overview of the feminist movement and words to guide others. Third-wave feminists are aware of both the victories won by earlier feminists and the problems of class, race, sexual orientation, and internationalism that must still be overcome. This book weaves a deep respect for the foremothers with commonsense discussion of current obstacles and suggestions for direct action, resulting in a work that reminds us of what too many activists forget—every progressive movement has a long history, few organizing tricks are new, and problems must be understood before they can be solved. Seely includes booklists, time lines, web sites, and how-to tips that will help readers over the bridge from her insights to real world activism. For midsize to larger public libraries, academic libraries, and all feminist collections. —Library Journal "Want to know what it means to be a feminist of the third wave? "As timely as it is well-written, this clear-eyed collection is just what I need right now." —Jacqueline Woodson, author of *Brown Girl Dreaming* "The intersectional feminist anthology we all need to read" (*Bustle*), edited by a feminist activist and writer who "calls to mind a young Audre Lorde" (*Kirkus*) Why do some women struggle to identify as feminists, despite their commitment to gender equality? How do other aspects of our identities — such as race, religion, sexuality, gender identity, and more — impact how we relate to feminism? Why is intersectionality so important? In challenging, incisive, and fearless essays — all of which appear here for the first time — seventeen writers from diverse backgrounds wrestle with these questions, and more. A groundbreaking book that elevates underrepresented voices, *Can We All Be Feminists?* offers the tools and perspective we need to create a 21st century feminism that is truly for all. Including essays by: Soofiya Andry, Gabrielle Bellot, Caitlin Cruz, Nicole Dennis-Benn, Brit Bennett, Evette Dionne, Aisha Gani, Afua Hirsch, Juliet Jacques, Wei Ming Kam, Mariya Karimjee, Eishar Kaur, Emer O'Toole, Frances Ryan, Zoé Samudzi, Charlotte Shane, and Selina Thompson

This original study examines women's activism against war in areas as far apart as Sierra Leone, India, Colombia and Palestine. It shows women on different sides of conflicts in the former Yugoslavia and Israel addressing racism and refusing enmity and describes international networks of women opposing US and Western European militarism and the so-called 'war on terror'. These movements, though diverse, are generating an antimilitarist feminism that challenges how war and militarism are understood, both in academic studies and the mainstream anti-war movement. Gender, particularly the form taken by masculinity in a violent sex/gender system, is inseparably linked to economic and ethno-national factors in the perpetuation of war.
