~~Graves' Orbitopathy: A Multidisciplinary Approach~~

Abstract. Graves' thyroid disease is a relatively common disorder in endocrinology and general internal medicine practice. Graves' hyperthyroidism is mediated by circulating stimulating autoantibodies. Up to 60% of patients with Graves' hyperthyroidism develop some form of Graves' orbitopathy. Immune reactivity to the thyroid-stimulating hormone receptor is also thought to play a role in the immunopathogenesis of Graves' orbitopathy.

Ten years ago, the first edition of Graves ' Orbitopathy: A Multidisciplinary Approach was published. Since then, the book has become very popular and much has happened in the field to warrant a third edition. What has not changed is the successful and attractive question-and-answer format of the book.

~~Graves' Orbitopathy: A Multidisciplinary Approach~~

TED, also called Graves ' orbitopathy, is a rare autoimmune disease most often seen in patients with Graves ' disease, but is distinct from Graves ' itself. 1,2 A diagnosis of TED may even precede a finding of Graves ' and can serve as an early warning sign of impending thyroid dysfunction. 2 Importantly, TED can also occur in Hashimoto ' s hypothyroidism or even in euthyroid patients, so hyperthyroidism shouldn't be considered a defining risk factor. 1

~~Thyroid Eye Disease | Graves Ophthalmopathy~~

Introduction: Treatment of Graves' orbitopathy (GO) is a difficult challenge and should be performed through a multidisciplinary approach. Areas covered: This review covers the current treatment of hyperthyroidism and its effect on the course of GO. Treatment options for GO, according to its severity and activity, are discussed.

~~Treatment options for Graves' orbitopathy~~

Multidisciplinary expertise can help balance the need to manage comorbidities while avoiding an increased risk of TED progression For TED itself, glucocorticoids (steroids) are the most frequently used medical therapy, despite not being indicated to treat TED.
