It is said that the history of modern architecture can be observed through the evolution of the single-family home. Over generations, each has hoped to improve on the last, rethinking and reinventing this seemingly simple building type. At certain historic moments in the discourse, new

ideas about domesticity have given form to radically different configurations of home and community. Current emphasis on sustainability presents a unique opportunity to design affordable houses that respond to specific economic, social, and environmental challenges. In From the Ground Up editor Peggy Tully presents

the results of an international competition to create new models for affordable high-performance green homes in urban residential neighborhoods. Developed for a vacant infill site in Syracuse's Near Westside, these ambitious projects offer an array of innovative designs that provide a new vision for once-vital urban residential

“Everyone in a hospital leadership role

delivered by professionals who have sufficient time and resources to care for them. This book offers proven and practical approaches for redesigning healthcare organizations to be less fragmented—and more patient-centered—by tapping into the experiences of staff on the front lines of patient care. Peter Lazes and

Marie Rudden show how collaboration and active communication among administrators, medical staff, and patients are a core element of a successful organizational change effort. Through case studies and the direct voices and experiences of frontline workers, they explore exactly what it takes to effectively

engage staff and providers in improving the patient care shortcomings within their institutions. This book not only is a manual detailing what can be achieved when frontline staff have a direct voice in controlling their practice environments but was written to show how to accomplish transformative changes in how our

hospitals and outpatient clinics work. At a time when the massive gaps in our healthcare systems have been laid bare by the fragmented responses to the COVID-19 pandemic, this book offers hope and a plan for change.

From the longtime CEO and chairman of Starbucks, a bold, dramatic work about the new responsibilities that leaders, businesses, and citizens share in American society today—as viewed through the intimate lens of one man's life and work. What do we owe one another? How do we channel our drive, ingenuity, even our

pain, into something more meaningful than individual success? And what is our duty in the places where we live, work, and play? These questions are at the heart of the American journey. They are also ones that Howard Schultz has grappled with personally since growing up in the Brooklyn housing projects and while

building Starbucks from eleven stores into one of the world's most iconic brands. In From the Ground Up, Schultz looks for answers in two interwoven narratives. One story shows how his conflicted boyhood—including experiences he has never before revealed—motivated Schultz to become the first in his family to

graduate from college, then to build the kind of company his father, a working-class laborer, never had a chance to work for: a business that tries to balance profit and human dignity. A parallel story offers a behind-the-scenes look at Schultz's unconventional efforts to challenge old notions about the role of business in

society. From health insurance and free college tuition for part-time baristas to controversial initiatives about race and refugees, Schultz and his team tackled societal issues with the same creativity and rigor they applied to changing how the world consumes coffee. Throughout the book, Schultz introduces a cross-section of

Americans transforming common struggles into shared successes. In these pages, lost youth find first jobs, aspiring college students overcome the yoke of debt, post-9/11 warriors replace lost limbs with indomitable spirit, former coal miners and opioid addicts pave fresh paths, entrepreneurs jump-start dreams, and

better angels emerge from all corners of the country. From the Ground Up is part candid memoir, part uplifting blueprint of mutual responsibility, and part proof that ordinary people can do extraordinary things. At its heart, it's an optimistic, inspiring account of what happens when we stand up, speak out, and come together

for purposes bigger than ourselves. Here is a new vision of what can be when we try our best to lead lives through the lens of humanity. “Howard Schultz’s story is a clear reminder that success is not achieved through individual determination alone, but through partnership and community. Howard’s commitment to both have
