Investigates and questions the scientific consensus on the origins of civilization Do we, the human species, really know who we are or where we came from or how we originated or our place in the cosmos? Or is much of what we have been taught wrong or misguided or possibly even blatant lies intended to keep people in power and everyone else in line? Exploring alternative theories on the establishment of society and civilization, Hidden History: Ancient Aliens and the Suppressed Origins of Civilization looks at a variety of dissenting, suppressed, and forbidden accounts of history and the origins of humanity. It takes a broad and inclusive survey of historical documents, various theories, and a wide array of perspectives to explore what conventional wisdom might have gotten right and wrong. The book serves as a useful introduction into the suppressed accounts of the origins of modern civilization. It combines cutting-edge science with metaphysical, spiritual, and even paranormal views, daring to ask whether there might be a better explanation for humanity’s existence and the origins of civilization than the current scientific consensus. Hidden History looks at the multiverse and parallel dimensions, the ancient alien theory, metaphysics, and hypotheses beyond physical perception, the eleven dimensions of string theory, radio telescopes that penetrate to the event horizon of our universe, mathematical equations that take us where no one has gone before, and the world-wide sharing of experiences old and new that speak of long forgotten ancient mythologies that reveal historical truths. With more than 120 photos and graphics, this tome is richly illustrated. Its helpful bibliography provides sources for further exploration, and an extensive index adds to its usefulness. This fascinating book is a thorough investigation and examination of the mysteries surrounding early civilizations, their myths, legends, histories, monuments--and lasting legacies.
