IEEE Guide for the Measurement of Partial Discharges in AC ... What is Partial Discharge (PD) •An incomplete electrical breakdown between two conductors •Corona is a type of PD, where the PD is occurring on a conductor surface and is the result of a high local (non-uniform) electric stress •Generally PD is only likely to occur on equipment operating at 3.3 kV phase to phase or above •PD is known to occur in power cables, stator windings, transformers and switchgear.
