SPLIT TYPE AIRCON CLEANING (DAIKIN INVERTER) Inverter Series
Daikin
For the typical family in North America, heating and cooling results in substantial energy consumption within the home. Daikin inverter systems are an energy-saving technology that helps reduce wasted operation in HVAC systems (compared to single and two stage systems) by efficiently controlling motor speed within the compressor of the unit. Temperature is adjusted by changing motor speed, maintaining your comfort while operating at an energy conserving level.
