VIRTUAL LAB: University of Arizona Karyotyping Activity ...

During mitosis, the 23 pairs of human chromosomes condense and are visible with a light microscope. A karyotype analysis usually involves blocking cells in mitosis and staining the condensed chromosomes with Giemsa dye. The dye stains regions of chromosomes that are rich in the base pairs Adenine (A) and Thymine (T) producing a dark band.

Patient B’s completed karyotype is at the bottom of the page for reference. On a separate piece of paper, answer the following 2 questions.

Solved: Karyotyping Activity Patient B’s Karyotype Congrat ...

Lab technicians compile karyotypes and then use a specific notation to characterize the karyotype. This notation includes the total number of chromosomes, the sex chromosomes, and any extra or missing autosomal chromosomes. For example, 47, XY, +18 indicates that the patient has 47 chromosomes, is a male, and has an extra autosomal chromosome 18.
