Water notebook.

Virtual Lab - Welcome to Biology!
Objective: In this lab, you will use a computer simulation to track a population of organisms as they evolve. The simulation allows you to change certain features of your population, like mutation rate and selection strength. Your goal is to gather data, graph the data and analyze which factors influence the rate of evolution.

Water Lab Questions 1. Why ...

Scientists use transgenic organisms, which contain DNA that scientists inserted in the organisms' genomes, to research many biological processes. In this lab, students produce and conduct experiments with virtual versions of transgenic *Drosophila* fruit flies. Students first create transgenic flies that glow when a gene involved in circadian rhythms is activated.
