Hi all, I'm trying to diagnose a problem with my Mistsi L3E fitted to a Volvo mini excavator (271 I think).. Anyway after some hard starting and I think loss of power (stalls whilst digging etc.) , I've pulled the engine out to investigate. I've looked through a few really good threads on this site about this engine, and I think there are a good few experts around here that know thier stuff ...

Seeing is Understanding. The first VISUAL guide to marine diesel systems on recreational boats. Step-by-step instructions in clear, simple drawings explain how to maintain, winterize and recommission all parts of the system - fuel deck fill - engine - batteries - transmission - stern gland - propeller. Book one of a new series. Canadian author is a sailor and marine mechanic cruising aboard his 36-foot steel-hulled Chevrier sloop. Illustrations: 300+ drawings Pages: 222 pages Published: 2017 Format: softcover Category: Inboards, Gas & Diesel

This book is neither autobiography nor a family history. It is a short account of an unusual childhood and the experience of being born into a family living in a repressive political system. The family members faced many restrictions in their daily lives but, in other respects, managed to avoid the worst excesses of the Communist regime. The book recounts how, despite many limitations, the author and her brother were protected, encouraged to flourish and were not held back by a hostile political environment until their adult years. The book recalls the high and low points of life behind the Iron Curtain in one of the least politically conformist countries of the Soviet controlled Eastern Europe. The work records how dramatically life had changed in a previously cut-off society which, nevertheless, had always held high hopes for future progress.

The development of photosensitive materials in general and photoreactive polymers in particular is responsible for major advances in the information, imaging, and electronic industries. Computer parts manufacturing, information storage, and book and magazine publishing all depend on photoreactive polymer systems. The photo- and radiation-induced processes in polymers are also active areas of research. New information on the preparation and properties of commercially available photosensitive systems is constantly being acquired. The recent demand for environmentally safe solvent-free and water-soluble materials also motivated changes in the composition of photopolymers and photoresists. The interest in holographic recording media for head-up displays, light scanners, and data recording stimulated development of reconfigurable and visible light sensitive materials. Photoconductive polymerizable coatings are being tested in electrostatic proofing and color printing. The list of available initiators, polymeric binders, and other coating ingredients is continually evolving to respond to the requirements of low component loss (low diffusivity) and the high rate of photochemical reactions.

Transmediality in Independent Journalism investigates mainstream journalism and its escape routes to independence through transmedia strategies. Within the scope of the latest debates in Turkey, the author argues that the function of transmediality in Turkish journalism is gradually shifting from being only a commercial entity to becoming a political system for social change, a survival mechanism for independent journalists to reach out to diverse audiences, and gain back the public trust. Bringing a fresh perspective to recent studies on cultures of transmediality along with an in-depth analysis of three contemporary Turkish cases, the book: Builds upon questions of whether transmedia storytelling can offer a support system to construct an alternative news media world in a political context such as Turkey ' s Examines how transmedia storytelling can reach places the mainstream news media can ' t control Explores whether transmedia storytelling can sustain the survival of an independent journalist in Turkey ' s political context Looking beyond the case of Turkey, this study will be an important addition to the literature on rethinking journalistic form and practice, teaching transmedia strategies, and social communication. It will be of great benefit to students and scholars of journalism studies, transmedia studies, and media and communication studies.
