### Karp's Cell and Molecular Biology: Concepts and ...

I have studied with Gerald Karp books since I was an undergraduate student (Biochemistry, and Karp book was always by my side, very useful). This book explain the cellular metabolism, structures (cytoskeleton, microtubules, filaments, genes, relations between genes and proteins, DNA repair, cell cycle, cell signalling, lot of concepts that are not easy to understand at first, Karp does it very simple.

### Cell and Molecular Biology: Concepts and Experiments: Karp ...

Cell and Molecular Biology by Gerald Karp is surpassed only in diagram clarity and simplicity by Cooper and Hausman's "The Cell: A Molecular Approach" which has the best diagrams of all cell biology textbooks but is slightly less comprehensive (I own that one too!).
