# Mooring Equipment Guidelines

Thank you very much for downloading mooring equipment guidelines. Maybe you have knowledge that, people have look numerous times for their chosen books like this mooring equipment guidelines, but end up in infectious downloads.

Rather than reading a good book with a cup of coffee in the afternoon, instead they juggled with some malicious virus inside their computer.

mooring equipment guidelines is available in our book collection an online access to it is set as public so you can download it instantly.

# Get Free Mooring Equipment Guidelines

Our digital library saves in multiple countries, allowing you to get the most less latency time to download any of our books like this one.

Kindly say, the mooring equipment guidelines is universally compatible with any devices to read

OCIMF Mooring Equipment Guidelines (MEG4) Industry News. A look at what 's new – and what you might not have implemented yet. The fourth edition of the Oil Companies International Marine Forum (OCIMF) Mooring Equipment Guidelines (MEG4) was issued in July 2018. These revisions were brought in in response to changes in the design of the terminals and ships, the evolution of mooring lines and concerns over mooring lines failing under tension, which has resulted in serious incidents on board.

## ~~OCIMF – Mooring Equipment Guidelines (MEG)~~

The Oil Companies International Marine Forum (OCIMF) has introduced new guidelines for the safe mooring of tankers and gas carriers at terminals. A Mooring System Management Plan (MSMP) is part of the requirements to ensure risks are managed through the safe design and operation of mooring systems. Learn more about the MSMP in this technical news.

catenary or taut leg moorings of mobile offshore units (MOU) b. Offshore catenary or taut leg mooring of floating offshore installations (FOI) c. Inshore mooring of MOUs and FOIs, e.g. for stacking d.

~~0032/ND Guidelines for Moorings—  
DNV GL~~

MEG4 provides the below guidelines for a generic mooring line layout. Breast mooring lines should be at an angle less than 15° to the perpendicular axis of the ship. Spring mooring lines should be at an angle less than 10° to the side of the ship. Maximum vertical angles of 25 degrees should be assumed for the lightest ballasted condition.
