Prepare your students for safe, collaborative clinical practice. Focusing on the most important nursing care plans for practice, this updated edition of Carpenito's practical resource helps students learn how to create nursing care plans, effectively document care, and build clinical reasoning and decision-making skills. To help achieve quality outcomes and prevent adverse events, care plans identify individuals who are at high risk for falls, pressure ulcers, and infection and prepare the individual/family for transition to home or another facility. A user-friendly organization splits Collaborative Problems and Nursing Diagnosis in each chapter and organizes care plans by Medical Conditions, Surgical Procedures, and Diagnostic and Therapeutic Procedures. KEY FEATURES UPDATED! All nursing diagnoses reflect today's best practices. NEW! Up-to-date content enriches the presentation, including new techniques on increasing a patient's motivation to learn self-care and new discussions in a new Appendix C on how to teach individuals with low health literacy. Evidence-based rationales and guidelines help students understand how research informs practice. Clinical Alerts advise students of serious events that require immediate action and need to be reported in a timely and sometimes urgent fashion. An evidence-based model, STAR (Stop, Think, Act, Review), shows students how to assess a situation prior to intervening and how to evaluate the response after acting. A SBAR (Situation, Background, Assessment, Recommendation) framework facilitates clear, consistent, and succinct communication of pertinent information among health care

This one-of-a-kind text covers every aspect of independent nursing care -- it's a must-have resource for every practicing and student nurse! Content includes nursing care plans for the care of all adults regardless of their clinical situation; detailed care plans for specific clinical problems; collaborative problems and nursing diagnoses; and a strong emphasis on documentation. It also includes research validated identification of frequently encountered nursing diagnoses and collaborative problems. This edition contains 15 new care paths for common diseases/disorders

Enter the world of nursing care planning with confidence! This informative guide is the perfect way to build your care planning and documentation skills. Practical and easy-to-read material covers each phase of care plan development and record-keeping for both surgical and non-surgical interventions.

"Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-

Read Book Nursing Care Plans And Documentation Nursing Diagnosis And Collaborative Problems

Don'ts of charting – a common sense approach that addresses a wide range of topics, including:

- Documentation and the nursing process—assessment, nursing diagnosis, planning care/outcomes, implementation, evaluation
- Documenting the patient's health history and physical examination
- The Joint Commission standards for assessment
- Patient rights and safety
- Care plan guidelines
- Enhancing documentation
- Avoiding legal problems
- Documenting procedures
- Documentation practices in a variety of settings—acute care, home healthcare, and long-term care
- Documenting special situations—release of patient information after death, nonreleasable information, searching for contraband, documenting inappropriate behavior

Special features include:

- Just the facts – a quick summary of each chapter's content
- Advice from the experts – seasoned input on vital charting skills, such as interviewing the patient, writing outcome standards, creating top-notch care plans
- "Nurse Joy" and "Jake" – expert insights on the nursing process and problem-solving
- That's a wrap! – a review of the topics covered in that chapter
