Clinical Evaluation of Language Fundamentals-Third Edition (CELF-3), like Clinical Evaluation of Language Fundamentals-Revised (CELF-R) (Semel, Wiig, & Secord, 1987), is an individually administered clinical tool for the identification, diagnosis, and follow-up evaluation of language skill deficits in school-age children, adolescents, and young adults. CELF-3 was designed to identify individuals ages 6 years 0 months through 21 years 11 months who lack the basic foundations of content and form that characterize mature language use: word meanings (semantics), word and sentence structure (morphology and syntax), as well as the recall and retrieval of spoken language (memory). -- Examiner's manual, P. 1.

Comprehensive Handbook of Psychological Assessment, Volume 2 presents the most up-to-date coverage on personality assessment from leading experts. Contains contributions from leading researchers in this area. Provides the most comprehensive, up-to-date information on personality assessment. Presents conceptual information about the tests.

Issued for use as a kit, consisting of 4 components, tracks articulation skills from preschool through primary and secondary school years and into young adulthood.

Bayley 4 Clinical Use and Interpretation provides clinicians with a guide for use, administration, scoring and interpretation of the Bayley Scales of Infant and Toddler Development, Fourth Edition. The book begins with why and how the Bayley 4 was revised. Separate chapters discuss the clinical use and interpretation of the cognitive, language, motor, social-emotional and adaptive scales, each with illustrative clinical cases. Recommendations are provided to aid clinicians in the efficiency of test administration, as well as how to interpret and integrate results within a diagnostic assessment format and in planning intervention. The clinical validity of the Bayley 4 is demonstrated for eight clinical groups. There is an overview of Autism Spectrum Disorder (ASD) with the Bayley 4 ASD Checklist, accommodations, and red flags indicative of abnormality. Additional chapters discuss digital administration and how to present feedback to caregivers. Summarizes what is new and different in the Bayley 4 Guides clinicians in use, administration, scoring, and interpretation Identifies the clinical validity of Bayley 4 for eight clinical groups Suggests how to integrate results into assessment and intervention Includes use for autism assessment and an ASD checklist Provides case studies on typical and atypical development

Handbook of Psychological Assessment, Fourth Edition, provides scholarly overviews of the major areas of psychological assessment, including test development, psychometrics, testing technology and commonly used assessment measures. Includes psychological assessment for all ages, with new coverage encompassing ethnic minorities and the elderly. Assessment methodologies discussed include formal testing, interviewing and observation of behavior. The handbook also discusses assessment of different facets of personality and behavior, including intelligence, aptitude, interest, achievement, personality and psychopathology. Features new authors, heavy revisions to previous chapters, and 65% new material, including the use of assessments in forensic applications. Encompasses test development, psychometrics and assessment measures Covers assessment for all age groups Includes formal testing, interviews and behavioral observation as testing measures Details assessments for intelligence, aptitude, achievement, personality and psychopathology Offers new coverage of assessments used in forensic psychology and with ethnic minorities Features 65 percent new material, with 5 new chapters
--

Now in its Third Edition, this book clarifies the distinctions between the vast array of personality disorders and helps clinicians make accurate diagnoses. It has been thoroughly updated to incorporate the changes in the forthcoming DSM-5. Using the classification scheme he pioneered, Dr. Millon guides clinicians through the intricate maze of personality disorders, with special attention to changes in their conceptualization over the last decade. Extensive new research is included, as well as the incorporation of over 50 new illustrative and therapeutically detailed cases. This is every mental health professional's essential volume to fully understanding personality.

Diverse learners with exceptional needs require a specialized curriculum that will help them to develop socially and intellectually in a way that traditional pedagogical practice is unable to fulfill. As educational technologies and theoretical approaches to learning continue to advance, so do the opportunities for exceptional children. Special and Gifted Education: Concepts, Methodologies, Tools, and Applications is an exhaustive compilation of emerging research, theoretical concepts, and real-world examples of the ways in which the education of special needs and exceptional children is evolving. Emphasizing pedagogical innovation and new ways of looking at contemporary educational practice, this multi-volume reference work is ideal for inclusion in academic libraries for use by pre-service and in-service teachers, graduate-level students, researchers, and educational software designers and developers.

The third edition of Manual of Traumatic Brain Injury offers a thorough revision of the popular evidence-based guide to understanding and managing all levels of traumatic brain injury. Comprehensive in scope and concise in format, this reference describes the spectrum of injury from mild to severe and the continuum of care from initial injury to management of chronic sequelae. Chapters are designed with a practical clinical focus for targeted retrieval of content by topic area and for self-review. The text is organized into five sections. Part I addresses fundamental concepts necessary for understanding the underpinning of clinical decision-making. Part II is dedicated to mild TBI, including sport-related concussion, with chapters covering topics from natural history to associated somatic disorders, post-concussion syndrome, and PTSD. Part III covers moderate to severe TBI and details prehospital emergency and ICU care, rehabilitation, treatment of related conditions, and postinjury outcomes. Part IV focuses on TBI-related complications, including posttraumatic seizures, spasticity, behavioral and sleep disturbances, and chronic traumatic encephalopathy (CTE). Part V reviews special considerations in selected populations such as pediatric TBI and TBI in the military, as well as medicolegal and ethical considerations in TBI, complementary and alternative medicine, and return to work considerations. Each chapter includes boxed Key Points which underscore major clinical takeaways, Study Questions to facilitate self-assessment and further emphasize core chapter content, and an Additional Reading list for a deeper dive into chapter concepts. Significant updates incorporating recent advancements in the field, combined with the clinical acumen of its experienced contributors, make this third edition the essential manual for healthcare professionals caring for individuals with traumatic brain injury. Key Features: Succinct format encourages targeted access to key clinical information Completely revised and updated third edition reflects current state of the art advancements Added content areas such as a new chapter dedicated to substance abuse and TBI expand the scope of material addressed Newly added multiple choice Study Questions in each chapter facilitate self-assessment of mastery of chapter material
