Unprecedented times lead to a lot of changes. There are some things, however, that should stay the same. The assembly of the saints on the Lord's Day is one of those precedents. During the

coronavirus crisis of 2020, thousands of churches stopped assembling together. The biblical duty of gathering together was temporarily put on hold; the essential nature of the gathering of the saints was called into question. In *Essential Service: Coronavirus and the Assembly of the Saints*, Chris Hume seeks to show that the gathering of the church is indeed an essential service, vital for the life of believers. Hume lays a biblical foundation for continuing to meet, showing how doing so is not only our duty, but is also for our good and in accord with the Christians who have gone before us. The book makes application to the coronavirus crisis of 2020 and also looks beyond that pandemic. The revised edition (Feb 2021) includes an appendix on whether pastors should require face masks and social distancing.

TCRP report 155 provides guidelines and descriptions for the design of various common types of light rail transit (LRT) track. The track structure types include ballasted track, direct fixation ("ballastless") track, and embedded track. The report considers the characteristics and interfaces of vehicle wheels and rail, tracks and wheel gauges, rail sections, alignments, speeds, and track moduli. The report includes chapters on vehicles, alignment, track structures, track components, special track work, aerial structures/bridges, corrosion control, noise and vibration, signals, traction power, and the integration of LRT track into urban streets.

neuroplasticity? Is it possible to change your brain? Norman Doidge's inspiring guide to the new brain science explains all of this and more. An astonishing new science called neuroplasticity is overthrowing the centuries-old notion that the human brain is immutable, and proving that it is, in fact, possible to change your brain. Psychoanalyst, Norman Doidge, M.D., traveled the country to meet both the brilliant scientists championing neuroplasticity, its healing powers, and the people whose lives they've transformed—people whose mental limitations, brain damage or brain trauma were seen as unalterable. We see a woman born with half a brain that rewired itself to work as a whole, blind people who learn to see, learning disorders cured, IQs raised, aging brains rejuvenated, stroke patients learning to speak, children with cerebral palsy learning to move with more grace, depression and anxiety

disorders successfully treated, and lifelong character traits changed. Using these marvelous stories to probe mysteries of the body, emotion, love, sex, culture, and education, Dr. Doidge has written an immensely moving, inspiring book that will permanently alter the way we look at our brains, human nature, and human potential.

Highlighted by two hundred full-color photographs, a celebration of American crafts and decorative arts and the artists who create them showcases masterpieces of furniture, wood, ceramics, glass, fiber, jewelry, metal, and basketry from the past two centuries, along with a look at how craft has shaped American history, arts, vitality, and identity. 25,000 first printing.
