We show that patterns of STEM specialization in skill acquisition already emerge during secondary and postsecondary education by studying the experiences of immigrant children in the United States. We argue that patterns of specialization among childhood immigrants are compatible with the idea that individuals acquire skills in ways that reinforce their early relative inclinations.

...

Being that skill acquisition is still in its infancy, researchers are still trying to figure out what best practices enhance the motor learning process for complex and applied motor skills outside of the lab setting. Traditional approaches to skill acquisition have failed to capture motor learning as a reflection of exploratory activity.

Skill Acquisition Rates And Patterns: Issues And Training Im
Learning to read is the acquisition and practice of the skills necessary to understand the meaning behind printed words. For a fairly good reader, the skill of reading should feel simple, effortless, and automatic. However, the process of learning to read is complex and builds on cognitive, linguistic, and social skills developed from a very early age.
