TDI, an abbreviation for "Turbocharged Direct Injection", is a marketing term used by Volkswagen Group for its turbocharged diesel engines that have direct fuel injection.

~~TDI (engine) - Wikipedia~~

Drawing on the virtues of the outgoing unit, the V6 3.0-litre TDI 231 PS 4MOTION engine, linked to an 8-speed automatic tiptronic gearbox, has an available torque of 369 lbs ft. The result is a significant gain in performance, with the time taken to accelerate from 0 to 62 mph clocking in at 7.5 seconds with a top speed of 135 mph.

~~TDI | VW Diesel Engines | Volkswagen UK~~

Technical Directions Inc. (TDI) has been developing turbine engine related technologies for industrial and military applications for the past two decades. The base technologies developed during this period have provided some unique features that are focused at the low-cost/expendable turbojet engine applications, such as mini-cruise missiles.

~~TDI - Technical Directions Inc~~

Unlike other forms of diesel engine, the TDI offers a lot of boost to the engine. This helps it to reflect the speed and rapid gear changes of a gasoline car, although diesel will still hold in the same gear for a while.

A tuning box connects to the engine of a vehicle to improve performance and fuel economy. It's the natural successor of the remap, an easily detected ECU tuning solution. TDI-Tuning write custom maps for every vehicle variant. These maps are then sent to the engine from a tuning box rather than writing them directly onto the engine ECU.

It was a complete redesign of the Tdi engine that aimed to give the Defender even more power. 1998 Land Rover Defender: In 1998, the Land Rover Defender got a new engine, which was dubbed the Td5. The Td5 was a 2.5-litre, five-cylinder inline turbo-diesel engine. Unlike the Td1, which it replaced, the Td5 met new Euro III emissions standards. 2007 Land Rover Defender: The Td5 was the last ...
