Food Emulsifiers and Their Applications - Google Books

The purpose of emulsifiers and stabilisers is to facilitate the mixing together of ingredients that normally would not mix, namely oils or fats and water. This mixture of oil droplets in water, or water droplets in oils is an emulsion that is created by a vigorous mixing action and sustained by an emulsifier, and often a stabiliser.

Essential Guide to Food Additives by Mike Saltmarsh, Royal ...

Emulsifiers stabilize emulsions, so in order to understand an emulsifier, we should first introduce an emulsion. An emulsion is an example of a dispersion, it is a mixture of two umiscible liquids. These liquids can be mixed together by force (a strong whisk or homogenizer), however, over time they will spontaneously split again. In an emulsion ...

What Are Emulsifiers and What is Their Function in Food ...

Emulsifiers can be endogenously produced or externally added to processed foods. Lysolecithin is an endogenous emulsifier produced from lecithin hydrolysis after treatment of egg yolk with phospholipases. The egg yolk thus produced can be useful in the processing of mayonnaise and in the sauce industry.
