In the Faculty of Science and Technology, much of our work is guided by the notion that people have an essential part to play in modern engineering and technology. Within our Faculty we are attempting to integrate the study of people, both as individuals and societies, with that of artefacts and the sciences that are involved. Our Faculty brings together leading academics from a wide variety of backgrounds, working together to ensure that broad perspectives of

The regulation of technology is an important and topical area of law, relevant to almost all aspects of society. *Technology Law: Australian and International Perspectives* presents a thorough exploration of the new legal challenges created by evolving technologies, from the use of facial recognition technology in criminal investigations to the rise and

Online Library Universities Science And Technology Law Agriculture Law Textbook

regulation of cryptocurrencies. A well-written and fascinating introduction to technology law in Australia and internationally, Technology Law provides thorough coverage of the theoretical perspectives, legislation, cases and developing issues where technology and the law interact. The text covers data protection and privacy, healthcare technology, criminal justice technology, commercial transactions, cybercrime, social media and intellectual property, and canvasses the future of technology and technology law. Written by leading experts in the field, Technology Law is an excellent resource for law students and legal professionals with an interest in the area.

This Handbook brings together a collection of essays exploring the connections between law and anthropology. This title highlights the narrative of how law and anthropology have and should relate to each other in relation to immigration, international justice forums, and writing new national constitutions.

This book is a comprehensive collection of cases, statutes, regulations and readings focused on the commercial development of new technologies, primarily by start-up and early-stage companies. It defines the technology innovation process as the set of decisions and actions by which an invention is

Online Library Universities Science And Technology Law Agriculture Law Textbook

transformed from a laboratory prototype into a commercially viable product or process; and defines the technology innovation period as the time between the point of invention (reduction to practice) and the point of market introduction. Technology Innovation Law and Practice addresses the gap in academic attention paid to the field of technology innovation. The book provides students, faculty and practitioners, both in law and other disciplines, with a single source of in-depth information on the laws that affect the technology innovation process. The book is unique in its interdisciplinary focus, in its emphasis on start-up and early-stage technology companies, and in its combination of instructional and reference materials.

Science and technology plays an increasingly important role in the continued development of international economic law. This book brings together well-known and rising scholars to explore the status and interaction of science, technology and international economic law. The book reviews the place of science and technology in the development of international economic law with a view to ensure a balance between the promotion of trade and investment liberalisation and decision-making based on a sound scientific process without hampering technological development. The book features chapters from a range of experts - including Lukasz

Online Library Universities Science And Technology Law Agriculture Law Textbook

Gruszczynski, Jürgen Kurtz, Andrew Mitchell and Peter K. Yu - who examine a wide range of issues such as investment law, international trade law, and international intellectual property. By bringing together these issues, the book asks how international trade and investment regimes utilise science and technology, and whether they do so fairly and in the interest of broader public policies. This book will be of great interest to researchers of international economic law, health law, technology law and international intellectual property law.

Presenting examples of how literary accounts can provide a supplement to our understanding of science in law, this book challenges the view that law and science are completely different. It focuses on stories which explore the relationship between law and science, especially cultural images of science that prevail in legal contexts. Contrasting with other studies of the transfer and construction of expertise in legal settings, this book considers the intersection of three interdisciplinary projects: law and science, law and literature, and literature and science. Looking at the appropriation of scientific expertise into law from these perspectives, this book presents an original introduction into how we can gain insight into the use

Online Library Universities Science And Technology Law Agriculture Law Textbook

of science in the courtroom and in policy and regulatory settings through literary sources.

Featuring foreword from Maciej Szpunar, First Advocate General at the Court of Justice of the European Union and Professor at the University of Silesia in Katowice This book delivers a comprehensive examination of the legal systems that regulate the responsibilities of intermediaries for illegal online content in both the EU and the US. It assesses whether existing systems are capable of tackling modern challenges, ultimately advocating for the introduction of a double-sided duty of care, requiring online intermediaries to do more to tackle
